Test kit

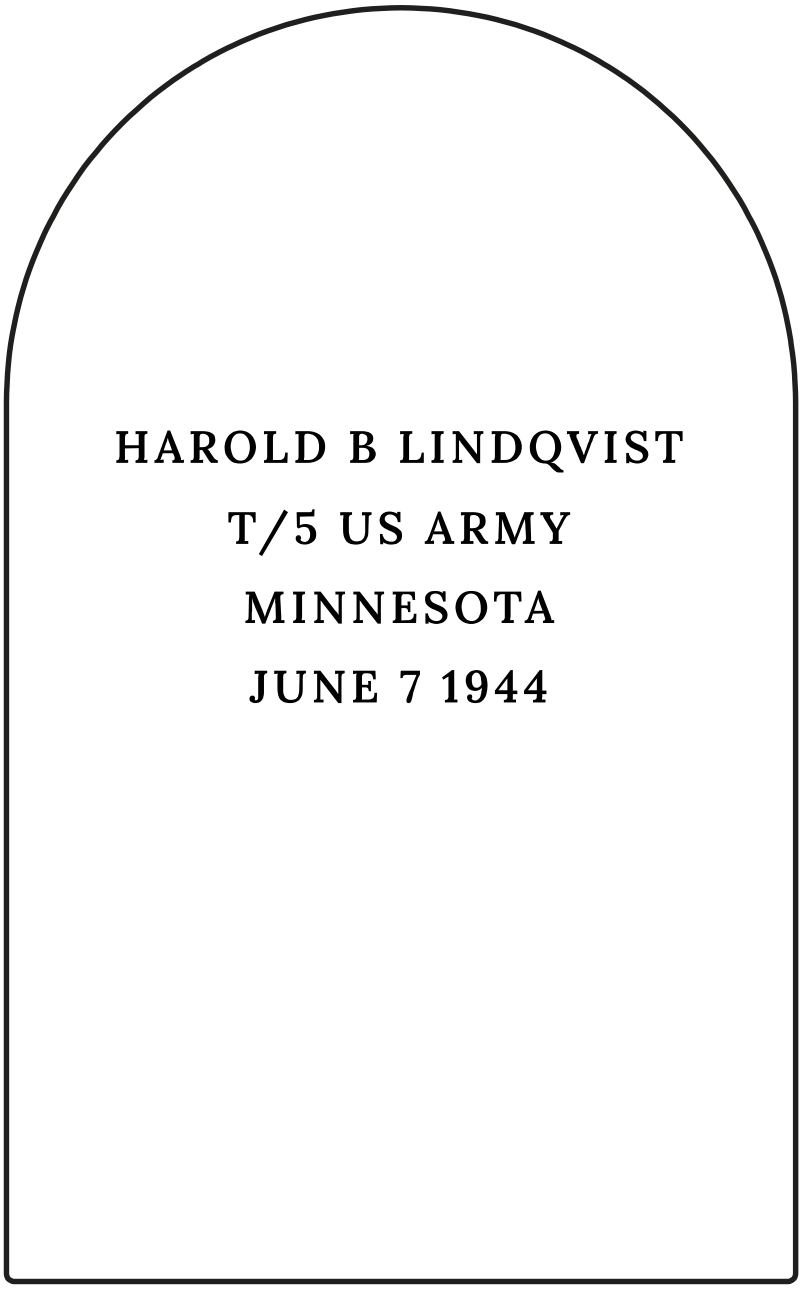

1. **Load the sample data first.** In the app, sign in as an admin, open Admin → Data & QR, and choose “Load sample data”. In demo mode the sample data is already loaded.
2. **Headstones (pages 2–7).** Lay a page flat or tape it to a wall in even light. In the app, open Scan → Headstone → Take photo. Fill the frame with the stone. The correct record should rank first; the Walter A. Haskins and William J. Hoskins pages test near-duplicate names.
3. **QR plaques (last pages).** Point the iPhone Camera app at a code to open the memorial directly, or use Scan → QR code inside the app.
4. The codes on this printout open **https://honor-and-respect.com**. Change the address at the top of this page before printing if you are testing on a different site, such as your Netlify preview address.

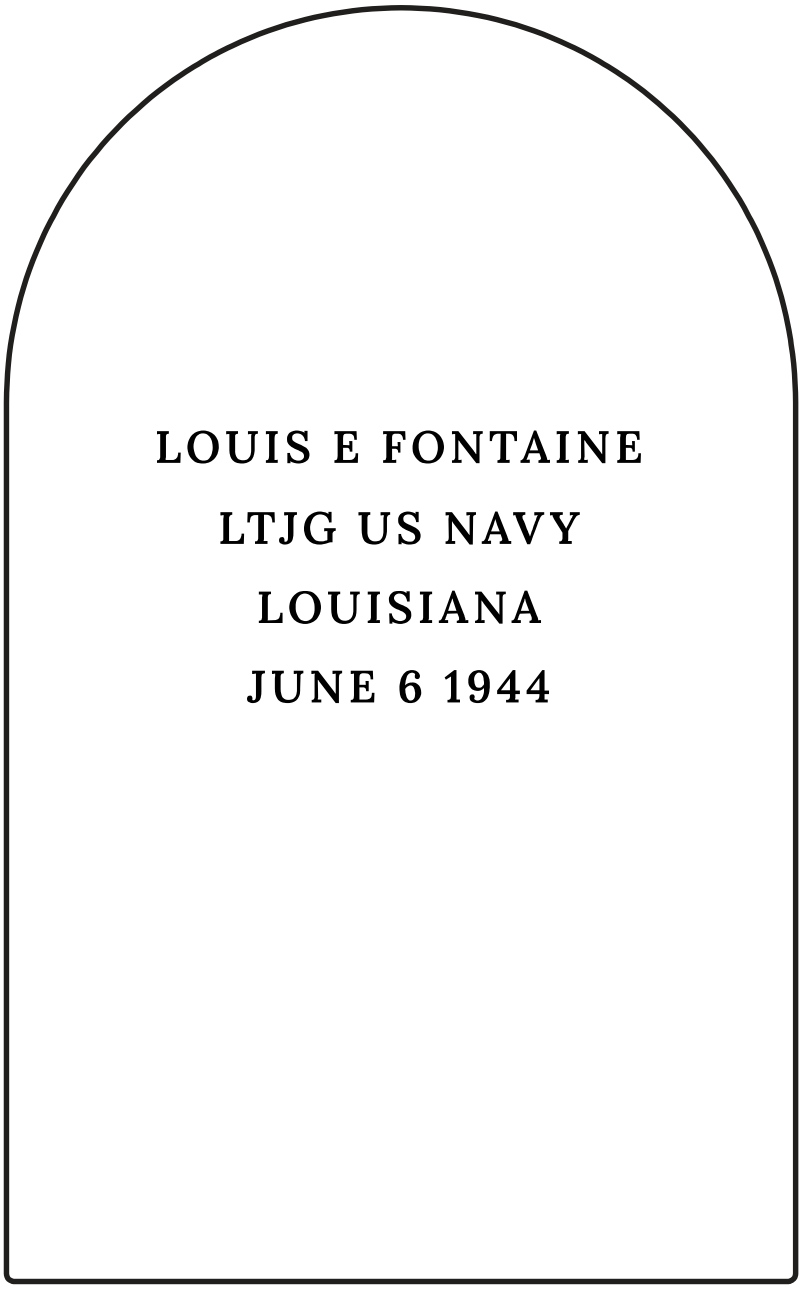

All names, dates and records in this kit are fictional sample data.

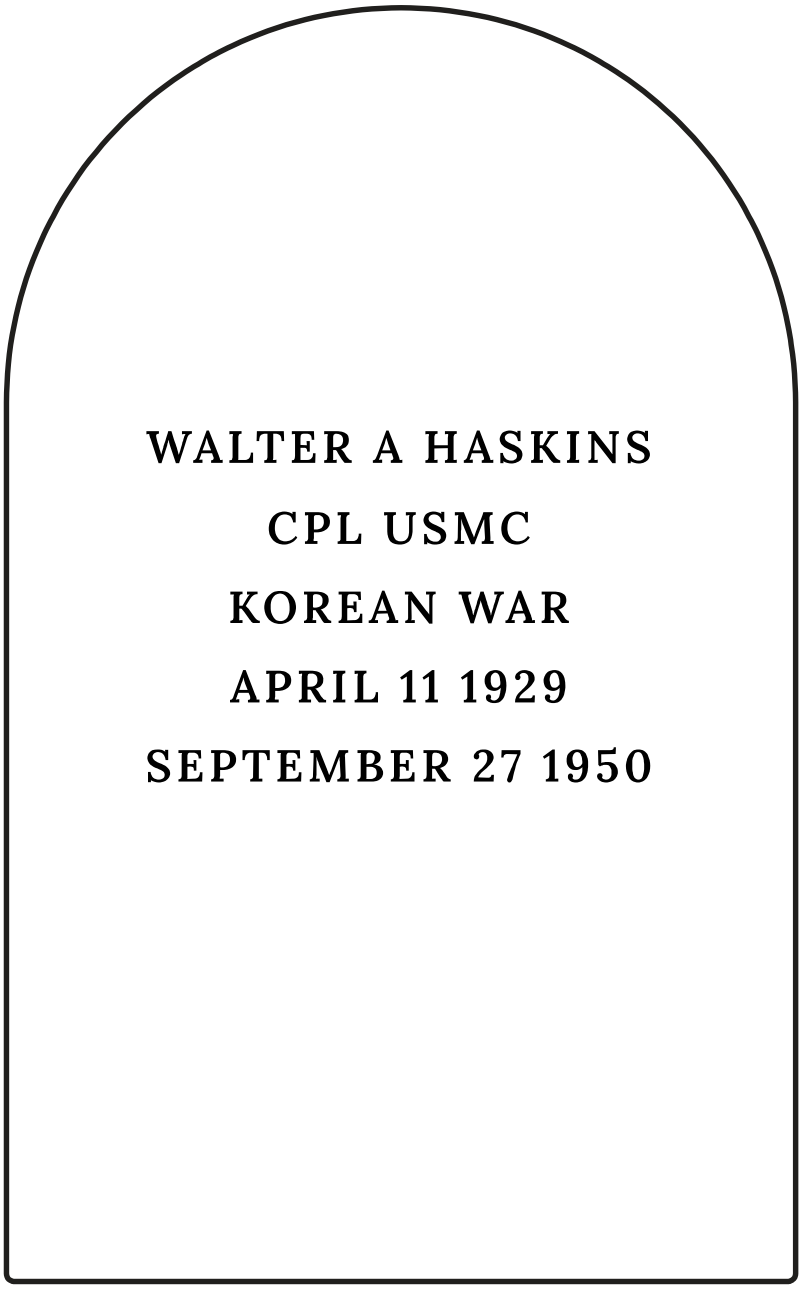

WALTER J HASKINS
SGT 116 INF 29 DIV
VIRGINIA
JUNE 6 1944
